

## TP ICAP takes a minority stakes in ipushpull

### *Strategic investment advances TP ICAP's transformation of its Global Broking business through technology*

**25 April 2023 – London:** TP ICAP, a world-leading liquidity and data solutions provider, has taken a minority stake in the UK FinTech firm, ipushpull.

The Series A investment will be used to expand the ipushpull team, enhance connectivity of the ipushpull platform, and scale up its live data sharing and workflow automation capacity. TP ICAP's move is in anticipation of increasing client demand for bespoke APIs, chat-based connectivity, and semi-automated workflows. As part of the investment, Dan Wray, Group CIO, TP ICAP, will join ipushpull's Board of Directors.

TP ICAP already leverages ipushpull's fast-to-market, omni-channel delivery as part of its award-winning Fusion technology offering. Fully integrated within Fusion, the ipushpull platform provides clients with custom connectivity links to chat solutions – such as Symphony, Teams, and Slack – and bespoke client API and Excel-based integrations. TP ICAP plans to extend the use of ipushpull to hundreds of clients across multiple asset classes throughout 2023.

**Dan Wray, Group CIO, TP ICAP Group,** said: “ipushpull is a flexible, scalable solution that sits alongside Fusion's existing FIX and STP solutions. This enables us to meet our clients' needs for speed and greater automation. Our investment reflects both the confidence we have in our partnership with ipushpull and the progress we're making in executing our strategy to transform our business through technology.”

**Matthew Cheung, CEO, ipushpull,** said: We are delighted that TP ICAP joins ipushpull as a strategic investor and partner using our no-code platform to increase client engagement and accelerate delivery of live data and workflow into client applications of choice, such as chat, Excel and APIs.”
