ICAP Global Derivatives Limited

FILING AS A: DCM SEF DCO SDR ECM/SPDC

TYPE OF FILING

- **Rules and Rule Amendments**

- Certification under § 40.6 (a) or § 41.24 (a)
- “Non-Material Agricultural Rule Change” under § 40.4 (b)(5)
- Notification under § 40.6 (d)
- Request for Approval under § 40.4 (a) or § 40.5 (a)
- Advance Notice of SIDCO Rule Change under § 40.10 (a)

- **Products**

- Certification under § 39.5(b), § 40.2 (a), or § 41.23 (a)
- Swap Class Certification under § 40.2 (d)
- Request for Approval under § 40.3 (a)
- Novel Derivative Product Notification under § 40.12 (a)

RULE NUMBERS

SEF Rule 801

DESCRIPTION

Interest Rate Swaps: (1) Fixed for Floating IRS, (2) Basis Swaps, (3) Forward Rate Agreements, (4) Overnight Index Swaps, (5) Non Deliverables Swaps, and (6) Interest Rate Options.

NOTICE OF LISTING OF PRODUCTS BY ICAP GLOBAL DERIVATIVES LIMITED FOR TRADING BY CERTIFICATION

1. This submission is made pursuant to CFTC Reg. 40.2 by ICAP Global Derivatives Limited (“IGDL SEF”).
2. The products certified by this submission are the following Interest Rates Swaps: (1) Fixed for Floating IRS, (2) Basis Swaps, (3) Forward Rate Agreements, (4) Overnight Index Swaps, (5) Non Deliverable Swaps, and (6) Interest Rate Options, in each case denominated in currency of USD, GBP or EUR (the “Contracts”).
3. Attached as Attachment A is a copy of the Contracts’ rules.
4. The Contracts are currently listed for trading on ICAP SEF (US) LLC (“ICAP SEF”), an affiliate of IGDL SEF, and were previously certified on September 29, 2013 in ICAP SEF’s initial product certification and on April 10, 2014 in filing ICAP-2014-P-13. This submission reflects that the trading of the Contracts is being transferred from ICAP SEF to IGDL SEF upon the temporary registration of IGDL SEF. No terms and conditions of the Contracts are being amended by this filing. IGDL SEF intends to list the Contracts for trading on May 12, 2014.
5. Attached as Attachment B is a certification from IGDL SEF that the Contracts comply with the Commodity Exchange Act and CFTC Regulations, and that IGDL SEF has posted a notice of pending product certification and a copy of this submission on its website concurrent with the filing of this submission with the Commission.
6. As required by Commission Regulation 40.2(a), the following concise explanation and analysis demonstrates that the Contracts comply with the core principles of the Commodity Exchange Act for swap execution facilities, and in particular Core Principle 3, which provides that a swap execution facility shall permit trading only in swaps that are not readily susceptible to manipulation, in accordance with the applicable guidelines in Appendix C to Part 38 of the Commission’s Regulations for contracts settled by cash settlement.

Each Contract has previously been certified for compliance with the Commodity Exchange Act and CFTC Regulations by ICAP SEF, an affiliate of IGDL SEF, including certification that each Contract is not readily susceptible to manipulation. No terms and conditions of the Contracts are being amended by this filing, and the Contracts’ rules as set forth in Attachment A are the same as the rules certified on September 29, 2013, with the exception of the certification of the additional RONIA Overnight Rate that was added to the contract specifications for the Overnight Index Swaps in filing ICAP-2014-P-13 and that only trading in Contracts denominated in USD, GBP or EUR are being transferred from ICAP SEF to IGDL SEF. Contracts denominated in other currencies will remain listed for trading on ICAP SEF and will not be listed for trading on IGDL SEF. During the period of time that the Contracts have been listed and traded on ICAP SEF, ICAP SEF has not experienced any manipulation or attempt to manipulate the Contracts. Following the listing of the Contracts for trading on IGDL SEF, they will no longer be traded on ICAP SEF, and ICAP SEF intends to delist them. Because the Contracts have been previously certified for compliance with the Commodity Exchange Act and CFTC Regulations, and because ICAP SEF has experienced no manipulation or attempt to manipulate the Contracts while they have been traded on ICAP SEF, IGDL SEF believes that the Contracts are not readily susceptible to manipulation and continue to comply with the Commodity Exchange Act and the CFTC Regulations.

In addition, the Contracts are not readily susceptible to manipulation for a number of other reasons: (1) the market is sufficiently liquid to prevent the Contracts from being susceptible to manipulation; (2), the Contracts are cash settled, and therefore do not present the potential for manipulation that exists in contracts that are physically settled; (3) IGDL SEF has adopted rules in its Rulebook that are substantially the same as the rules of ICAP SEF, pursuant to which the Contracts have traded without manipulation or attempted manipulation; (4) IGDL SEF is required to, and will, monitor all trading on the SEF in order to identify any such manipulative activity; (5) IGDL SEF has absolute

discretion to impose on its participants and customers fines and disciplinary sanctions in the event that such manipulative activity occurs. The data sources for this explanation are the Rulebooks of ICAP SEF and IGDL SEF and the institutional knowledge of ICAP SEF.

Product Specifications

Fixed for Floating IRS

A Fixed for Floating IRS is an Interest Rate Swap for which settlement is in the form of periodic fixed interest payments and a stream of periodic floating interest payments based on an interest rate over a term to maturity. The interest rate payments are exchanged for a specified period based on a notional amount.

Specifications

- Trading Conventions
 - Buyer (Payer) pays fixed interest rate and receives floating interest rate.
 - Seller (Receiver) receives fixed interest rate and pays floating interest rate.
- Swap Leg Conventions
 - The terms of Fixed versus Floating Interest Rate Swaps are based on a number of combinations of the criteria below.
 - Fixed Leg
 - Payment Frequency
 - Monthly, Quarterly, Semi-Annually, or Annually
 - Day Count Convention
 - Actual/360, actual/365, 360/360, 30/360, 30E/360, Actual Fixed/365, actual /366, actual / actual
 - Holiday Calendar
 - Applied in accordance for the country currency denoted for the instrument
 - Business Day Convention
 - Modified following with adjustment to period end dates. Business days in this convention must be valid business days for the countries denoted by the currency. If not, it will be the next day that is a business day on both calendars.
 - Fixed Rate
 - The traded interest rate yield or basis points on Trade Date
 - Floating Leg
 - Reset Frequency
 - Monthly, Quarterly, Semi-Annual
 - Day Count Convention
 - Actual/360, actual/365, 360/360, 30/360, 30E/360, Actual Fixed/365, actual /366, actual / actual
 - Holiday Calendar
 - Applied in accordance for the country currency denoted for the instrument
 - Business Day Convention
 - Modified Following with adjustment to period end dates. Business days in this convention must be valid business days for the countries denoted by the currency. If not, it will be the next day that is a business day on both calendars.
 - Fixed Rate
 - The traded interest rate yield or basis points on Trade Date
 - Interest Rate Benchmark
 - EBOR, BBSW, LIBOR, EURIBOR, CIDOR, PRIBOR, CIBOR2, BUBOR, TELBOR, NIBOR, BKBM, WIBOR,

STIBOR, JIBAR, SAIBOR, TIBOR, CZEONIA,
TRLIBOR, MOSPRIME

- Effective Date
 - The first date from which fixed and floating interest amounts accrue. It is also referred to as the Start Date or the Value Date. The Effective Date of the Swap must be a business day subject to the appropriate Business Day Convention.
- Trade Start Type
 - Spot Starting
 - A swap whose Effective Date is 2 business days from the Trade Date (T+2).
 - Forward Starting
 - A swap whose Effective Date is anything after the Effective Date for a Spot Starting swap.
 - Same Day Starting
 - A swap whose Effective Date is the same as the Trade Date (T+0)
- Maturity Date
 - The final date until which Fixed and Floating amounts accrue
- Tenor
 - The duration of time from the Effective Date to the Maturity Date. Tenors of any duration greater than 0 years to 50 years.
 - Listed Tenors, also known as On-the-Run, are whole calendar year Spot Starting Contracts with a Tenor of 1 through 60 years.
 - Other Tenors, also known as Off-the-Run, means any partial year Tenor (Months, Weeks, Days).
- Roll Day Convention
 - The date used for determining all fixed and floating Reset Dates. Roll Days define the beginning and end of Fixed and Floating interest accrual periods.
 - For On-the-Run Contracts, the Roll Day is the same date of the month as the Effective Date. For Off-the-Run Contracts, it can be any date of the month, subject to the provisions of the Business Day Convention. Roll Day marks the start of a new interest accrual period, and is the date on which a Reset Rate takes effect.
- Floating Reset Dates
 - Dates utilized to determine the Floating Rate amounts for each interest accrual period during the Tenor of the contract. Except in the case of a Stub Period, the Reset Date is aligned with the floating rate frequency as determined.
- First Period Fixing Date
 - For Spot Starting swaps, the Interest Rate for the first interest period is fixed on the Trade Date, for both Floating and Fixed Rates.
 - For Forward Starting swaps, the Fixed Rate for the first interest period is fixed on the Trade Date, and the Floating Rate for the first interest period is fixed 2 business days prior to the first floating payment date, taking into account agreed non working days
- Stub Period Rate
 - For swaps with partial year Tenors, an interest period that is shorter than the standard underlying Floating index interest periods may occur between the Effective Date and the first or last Roll Date (known as a Stub Period). In these cases, the Interest Rate for such Stub Period is determined using linear interpolation based on the two index rates that surround the Stub Period this can be applied either at the start or end of that period: Front or Back.
- Trade Types
 - The Platform may support the following trade types:

- Outrights
 - An Outright swap is where one party is the payer of the fixed rate and receiver of the floating rate and the other party is the receiver of the fixed rate and payer of the floating rate.
- Switches or Spreads
 - Is the simultaneous purchase and sale of two different Tenors of the yield curve (e.g. 2 year by 10 year).
- Butterflies
 - Butterflies are a combination of two spreads/switches (e.g. 2 year by 5 year by 10 year).
- Contract Size
 - Minimum notional size is dependent on currency and tenor
- Minimum Price Fluctuation
 - Outrights
 - The interest rate yield is quoted in increments of a minimum of .000025 (1/40th of a basis point).
 - Spreads and Butterflies will be quoted in basis points dependent in multiples of the increments of the underlying Outrights
- Final Settlement Price
 - Multiple payments take place during the term of the swap. Settlement price used for the periodic exchange of fixed and floating payments is based on the following factors:
 - Fixed Leg
 - Payment amount on the fixed leg is based on the traded price and notional amounts of the swap on Trade Date. Payment timing on the fixed leg is based on the Payment Frequency, Day Count Convention, Business Day Convention, and Roll Day.
 - Floating Leg
 - Payment on the floating leg is based on the Interest Rate and notional amounts of the swap. Payments on the floating leg are based on the Payment Frequency, Day Count Convention, Business Day Convention, Roll Day Convention and Floating Reset Dates.

Additionally, please see clearable contract definitions at <http://www.lchclearnet.com/> and <http://www.cmegroup.com/>.

Colombian Interest Rate Swaps

The plain vanilla swap, fixed Colombian versus IBR (which is a Colombian floating overnight lending rate) is quoted with both fixed and floating side payment frequency's of bullet (or at maturity) for trades of 1 month to 18 months, or quarterly, 2 year thru 30 year.

- Value: T+2
- Fixed/ Floating Rate Frequency: Bullet (1 month to 18 month), Quarterly (2 year to 30 year)
- Fixed/ Floating Rate Day count: ACT/360

This market is subject to modified NY and Bogota business days. When a swap matures on a NY or Bogota holiday, we will roll forward to the next good business day, unless month end, in which case we will roll back to the first good business day.

Colombian UVR (Inflation) Interest Rate Swaps

The plain vanilla swap, fixed UVR (which is a Colombian floating inflation index) versus floating 6 Month US Dollar Libor, is quoted with both fixed and floating side payment frequency's of semi-annually, 1 year thru 30 year.

- Value: T+2
- Fixed/ Floating Rate Frequency: Semi-Annually (1 year to 30 year)
- Fixed/ Floating Rate Day count: ACT/360

This market is subject to modified NY and Bogota business days. When a swap matures on a NY or Bogota holiday, we will roll forward to the next good business day, unless month end, in which case we will roll back to the first good business day.

Colombian Cross Currency Interest Rate Swaps

The plain vanilla swap, fixed Colombian versus floating 6 Month US Dollar Libor, is quoted with both fixed and floating side payment frequency's of semi-annually, 1 year thru 30 year.

- Value: T+2
- Fixed/ Floating Rate Frequency: Semi-Annually (1 year to 30 year)
- Fixed/ Floating Rate Day count: ACT/360

This market is subject to modified NY and Bogota business days. When a swap matures on a NY or Bogota holiday, we will roll forward to the next good business day, unless month end, in which case we will roll back to the first good business day.

Peruvian Cross Currency Interest Rate Swaps

The plain vanilla swap, fixed Peruvian versus floating 6 Month US Dollar Libor, is quoted with both fixed and floating side payment frequency's of semi-annually, 1 year thru 30 year.

- Value: T+2
- Fixed/ Floating Rate Frequency: Semi-Annually (1 year to 30 year)
- Fixed/ Floating Rate Day count: ACT/360

This market is subject to modified NY and Lima business days. When a swap matures on a NY or Lima holiday, we will roll forward to the next good business day, unless month end, in which case we will roll back to the first good business day.

Peruvian Interest Rate Swaps

The plain vanilla swap, fixed Peru versus TIS (which is a Peruvian floating overnight lending rate) is quoted with both fixed and floating side payment frequency's of bullet (or at maturity) for trades of 1 month to 11 months, or quarterly, 1 year thru 30 year.

- Value: T+2
- Fixed/ Floating Rate Frequency: Bullet (1 month to 11 month), Quarterly (1 year to 30 year)
- Fixed/ Floating Rate Day count: ACT/360

This market is subject to modified NY and Lima business days. When a swap matures on a NY or Lima holiday, we will roll forward to the next good business day, unless month end, in which case we will roll back to the first good business day.

Peruvian VAC (Inflation) Interest Rate Swaps

The plain vanilla swap, fixed VAC (which is a Peruvian floating inflation index) versus floating 6 Month US Dollar Libor, is quoted with both fixed and floating side payment frequency's of semi-annually, 1 year thru 30 year.

- Value: T+2
- Fixed/ Floating Rate Frequency: Semi-Annually (1 year to 30 year)
- Fixed/ Floating Rate Day count: ACT/360

This market is subject to modified NY and Lima business days. When a swap matures on a NY or Lima holiday, we will roll forward to the next good business day, unless month end, in which case we will roll back to the first good business day.

Argentine Cross Currency Interest Rate Swaps

The plain vanilla swap, fixed Argentine versus floating 6 Month US Dollar Libor, is quoted with both fixed and floating side payment frequency's of semi-annually, 1 year thru 30 year.

- Value: T+2
- Fixed/ Floating Rate Frequency: Semi-Annually (1 year to 30 year)
- Fixed/ Floating Rate Day count: 30/360

This market is subject to modified NY and Buenos Aires business days. When a swap matures on a NY or Buenos Aires holiday, we will roll forward to the next good business day, unless month end, in which case we will roll back to the first good business day.

Argentine CER (Inflation) Interest Rate Swaps

The plain vanilla swap, fixed CER (which is a Argentine floating inflation index) versus floating 6 Month US Dollar Libor, is quoted with both fixed and floating side payment frequency's of semi-annually, 1 year thru 30 year.

- Value: T+2
- Fixed/ Floating Rate Frequency: Semi-Annually (1 year to 30 year)
- Fixed/ Floating Rate Day count: 30/360

This market is subject to modified NY and Buenos Aires business days. When a swap matures on a NY or Buenos Aires holiday, we will roll forward to the next good business day, unless month end, in which case we will roll back to the first good business day.

Mexican Interest Rates Swaps

The plain vanilla swap is quoted with both fixed and floating side payment frequencies of 28 days. Since the payment periods are 28 day "months", a one year swap will have 13 payment periods and a maturity of 364 days, a two year swap will have 26 periods, and so on.

- Value: T+1
- Fixed/ Floating Rate Frequency: 28 day rolls
- Fixed/ Floating Rate Day count: ACT/360

This market is subject to Mexico following business day convention. When a 28 day period ends in a Mexican holiday, it is rolled forward to the next good business day in Mexico.

Prior to the 1998 inception of the Mexican TIE IRS market, and in the absence of a viable repo market, forward foreign exchange provided the only opportunity to express bi-directional interest rate views. The interest rate swap market evolved at this time, as an alternative vehicle for both hedgers and speculators to go short or long, and at the same time reducing the credit profile of the trade along the term structure.

 - Modified Following with adjustment to period end dates
 - Business days in this convention must be valid business days on both calendars
 - If not, it will be the next day that is a business day on calendars.
 - Interest Rate Benchmark
 - LIBOR, EURIBOR, WIBOR, NIBOR, CIBOR, BBSW, STIBOR, PRIBOR, BUBOR, TELBOR, BKBM, MOSPRIME, JIBAR, TIBOR
- Effective Date

- The first date from which floating interest amounts accrue. It is also referred to as the Start Date or the Value Date. The Effective Date of the Swap must be a business day subject to the appropriate Business Day Convention.
- Trade Start Type
 - Spot Starting
 - A swap whose Effective Date is 2 business days from the Trade Date (T+2).
 - Forward Starting
 - A swap whose Effective Date is anything after the Effective Date for a Spot Starting swap.
 - Same Day Starting
 - A swap whose Effective Date is the same as the Trade Date (T+0)
- Maturity Date
 - The final date until which Floating amounts accrue. The Maturity Date may also be referred to as the Termination Date or End Date.
- Tenor
 - The duration of time from the Effective Date to the Maturity Date. The Exchange will support Tenors of any duration greater than 0 years to 50 years.
 - Listed Tenors, also referred to as On-the-Run, means whole year Spot Starting or Same Day Starting Instruments with a Tenor of 1 through 15, 20, 25, 30, 35, 40,45 and 50 years.
 - Other Tenors means any whole year Tenors other than the Listed Tenors and any partial year Tenor.
- Roll Day Convention
 - The date used for determining all fixed and floating Reset Dates. Roll Days define the beginning and end of Floating interest accrual periods.
 - For On-the-Run Instruments, the Roll Day is the same date of the month as the Effective Date. For Off-the-Run Instruments, it can be any date of the month, subject to the provisions of the Business Day Convention. Roll Day marks the start of a new interest accrual period, and is the date on which a Reset Rate takes effect.
 - Note: Subject to good business days – as with all instruments, will never roll forward to the following month
- Floating Reset Dates
 - Dates utilized to determine the Floating Rate amounts for each interest accrual period during the Tenor of the Instrument. Except in the case of a Stub Period, the Reset Date is 2 business days (USD, EUR) or zero business days (GBP) prior to the Roll Date for that interest accrual period.
- First Period Fixing Date.
 - For Spot Starting and Same Day Starting swaps, the Interest Rate for the first interest period is fixed on the Trade Date, for both Floating Rates.
 - For Forward Starting swaps, the Floating Rate for the first interest period is fixed on the Trade Date, and the Floating Rate for the first interest period is fixed 2 business days prior to the Effective Date
- Stub Period Rate
 - For swaps with partial year Tenors, an interest period that is shorter than the standard underlying Floating index interest periods may occur between the Effective Date and the first or last Roll Date (known as a Stub Period). In these cases, the Interest Rate for such Stub Period is determined using linear interpolation based on the two index rates that surround the Stub Period this can be applied either at the start or end of that period: Front or Back.
- Trade Types
 - The Platform may support the following trade types:

- Outrights
 - An Outright swap is where one party is the payer of the floating rate 1 plus/minus a spread and receiver of the floating rate 2 and the other party is the receiver of the floating rate 1 plus/minus a spread and payer of the floating rate 2.
 - Switches
 - Switches are the simultaneous purchase and sale of two different Tenors of the yield curve (e.g. 2 year by 10 year).
 - Butterflies
 - Butterflies are the simultaneous purchase(s) and sale(s) of three different tenors of the yield curve (e.g. 2 year by 5 year by 10 year).
- Instrument minimum and incremental Size.
 - Minimum notional size is dependent on currency and tenor
 - Block Trades
 - Minimum notional size as stated by the CFTC and increments dependent on currency and tenor.
- Quoting Convention
 - Outrights are quoted in interest rate yield in a minimum 1/10th of a basis point increments.
 - Spreads and Butterflies are quoted in interest rate yield differential in minimum 1/10th basis point increments.
 - Spot Starting
 - Close of business on Trade Date.
 - Forward Starting
 - Close of business three business days prior to the Effective Date of the swap.
 - Block Trades must occur outside the CLOB and in a quantity that meets or exceeds CFTC thresholds.

Additionally, please see clearable contract definitions at <http://www.lchclearnet.com/> and <http://www.cmegroup.com/>.

Colombian Cross-Currency Basis Swaps

The plain vanilla basis swap, 3 month US Dollar Libor versus IBR (which is a Colombian floating overnight lending rate) is quoted with both fixed and floating side payment frequency's of quarterly, 2 year thru 30 year.

- Value: T+2
- Fixed/ Floating Rate Frequency: Quarterly (2 year to 30 year)
- Fixed/ Floating Rate Day count: ACT/360

This market is subject to modified NY and Bogota business days. When a swap matures on a NY or Bogota holiday, we will roll forward to the next good business day, unless month end, in which case we will roll back to the first good business day.

Mexican Cross-Currency Basis Swaps

Mexican TIIE/LIBOR basis swaps are quoted 28-day TIIE FLAT and 1 Month USD Libor as a spread over or under.

On the day of trading, market convention is to use that days USD LIBOR fix and the same days TIIE fix for 2 day value, thereafter the TIIE reverts to fixing 1 day prior.

The market is quoted as non mark-to-market cross currency swap with principal exchanged front and back.

Basis swaps trade more infrequently than the IRS market but the same type of players are involved. This is more of a customer based product historically than the IRS and is much less volatile.

US Floating Libor Rate vs Camara Floating Rate Basis Swap

This swap trades the 6 month Libor rate against the Camara Floating rate. Normal Price convention considers the basis spread over the Camara against a flat 6 month Libor.

- Value Date t+2
- Rate Day Count ACT/360
- Rate Frequency Semi-annual from 6 months up to 30 years.
- Day Convention Modified Following
- Calendars New York & Santiago

Forward Rate Agreement (FRA)

A Forward Rate Agreement is an Interest Rate Swap for which settlement is in the form of one fixed interest payment and one floating interest payment based on an interest rate benchmark to be paid or received on an obligation beginning at a future start date. The interest rate payments are exchanged based on a notional amount.

- Other Tenors means any Tenors other than the Listed Tenors.
- Floating Reset Dates
 - Dates utilized to determine the Floating Rate amount for the interest accrual period during the Tenor of the Instrument. Except in the case of a Stub Period, the Reset Date is adjusted business days dependent on the currency prior to the Roll Date for that interest accrual period.
- First Period Fixing Date
 - The Fixed Rate for the first interest period is fixed on the Trade Date, and the Floating Rate for the first interest period is fixed 2 business days prior to the Effective Date
- Trade Types
 - The Platform may support the following trade types:
 - Outrights
 - An Outright swap is where one party is the payer of the fixed rate and receiver of the floating rate and the other party is the receiver of the fixed rate and payer of the floating rate.
 - Switches also known as Spreads
 - These are the simultaneous purchase and sale of two different Tenors of the yield curve (e.g. 3x6 by 9x12).
- Instrument minimum and incremental Size.
 - *Minimum notional size is dependent on currency and tenor*
 - Block Trades. Minimum notional size as stated by the CFTC and increments Dependent on currency and tenor
- Quoting Convention
 - Outrights are quoted in interest rate yield in minimum of 1/40th of a basis point increments.
 - Spreads/Switches will be quoted in basis points dependent in multiples of the increments of the underlying Outrights
- Last Trading Day.
 - Spot Starting
 - Close of business on Trade Date.
 - Forward Starting
 - Close of business three business days prior to the Effective Date of the swap.
- Block Trades must occur outside the CLOB and in a quantity that meets or exceeds CFTC thresholds.

Overnight Index Swaps (OIS)

An Overnight Index Swap is an Interest Rate Swap for which settlement is in the form of periodic fixed interest payments and periodic floating interest payments based on an overnight rate being exchanged for a fixed interest rate over a term to maturity. The interest rate payments are exchanged for a specified period based on a notional amount.

Overnight index swaps are popular amongst financial institutions for the reason that the overnight index is considered to be a good indicator of the interbank credit markets, and less

risky than other traditional interest rate spreads. The interest rate cash flows are net settled in a major currency on fixing date.

Specifications

- Trading Conventions
 - Buyer (Payer) pays fixed interest rate and receives floating interest rate.
 - Seller (Receiver) receives fixed interest rate and pays floating interest rate.
- Swap Leg Conventions
 - The terms of Fixed vs. Floating Interest Rate Swaps are based on a number of combinations of the criteria below.
 - Fixed Leg
 - Payment Frequency
 - At Maturity Date, Annually, semi-annual, Quarterly, or monthly.
 - Day Count Convention
 - Actual/360, actual/365, 360/360, 30/360, 30E/360, Actual Fixed/365, actual /366, actual / actual
 - Holiday Calendar
 - Applied in accordance for the country currency denoted for the instrument
 - Business Day Convention
 - Modified Following with adjustment to period end dates. Business days in this convention must be valid business days on both the calendars. If not, it will be the next day that is a business day on both calendars.
 - Fixed Rate
 - The traded interest rate yield or basis points on Trade Date
 - Floating Leg
 - Reset Frequency
 - Daily
 - Day Count Convention
 - Actual/360, actual/365, 360/360, 30/360, 30E/360, Actual Fixed/365, actual /366, actual / actual
 - Holiday Calendar
 - Applied in accordance for the country currency denoted for the instrument
 - Business Day Convention

- Modified Following with adjustment to period end dates. Business days in this convention must be valid business days on both calendars. If not, it will be the next day that is a business day on both calendars.
 - Overnight Rate
 - Federal Funds, EONIA, SONIA, AONIA, CANADA OIS, TIS, PRIBOR, CITA, BUBOR, TELBOR01, TONAR, RBNZ02, POLONIA, MOSC, STINA, BRIBOR 01, TIBOR
 - Effective Date
 - The first date from which fixed and floating interest amounts accrue. It is also referred to as the Start Date or the Value Date. The Effective Date of the Swap must be a business day subject to the appropriate Business Day Convention.
 - Trade Start Type
 - Spot Starting
 - A swap whose Effective Date is 2 business days from the Trade Date (T+2).
 - Forward Starting
 - A swap whose Effective Date is anything after the Effective Date for a Spot Starting swap.
 - Same Day Starting
 - A swap whose Effective Date is the Trade Date (T+0)
 - Day +1 Starting
 - A swap whose Effective Date is the Trade Date (T+1)
 - Maturity Date
 - The final date until which Fixed and Floating amounts accrue. The Maturity Date may also be referred to as the Termination Date or End Date.
 - Tenor
 - The duration of time from the Effective Date to the Maturity Date. The Exchange will support Tenors of any duration greater than 0 years to 50 years.
 - Listed Tenors, also referred to as On-the-Run, means whole year Spot Starting or Same Day Starting Instruments with a Tenor of 1 through 15, 20, 25, 30, 35, 40, 45 and 50 years.
 - Other Tenors means any whole year Tenors other than the Listed Tenors and any partial year Tenor.
 - Roll Day Convention
 - The date used for determining all fixed and floating Reset Dates. Roll Days define the beginning and end of Fixed and Floating interest accrual periods.
 - For On-the-Run Instruments, the Roll Day is the same date of the month as the Effective Date. For Off-the-Run Instruments, it can be any date of the month, subject to the provisions of the Business Day Convention. Roll Day marks the start of a new interest accrual period, and is the date on which a Reset Rate takes effect.
 - Floating Reset Dates
 - Dates utilized to determine the Floating Rate amounts for each interest accrual period during the Tenor of the Instrument. Except in the case of a Stub Period, the Reset Date is adjusted business days dependent on the currency prior to the Roll Date for that interest accrual period.
 - First Period Fixing Date.
 - For Spot Starting and Same Day Starting swaps, the Interest Rate for the first interest period is fixed on the Trade Date, for both Floating and Fixed Rates.

- For Forward Starting swaps, the Fixed Rate for the first interest period is fixed on the Trade Date, and the Floating Rate for the first interest period is fixed 2 business days prior to the Effective Date
- Stub Period Rate
 - For swaps with partial year Tenors, an interest period that is shorter than the standard underlying Floating index interest periods may occur between the Effective Date and the first or last Roll Date (known as a Stub Period). In these cases, the Interest Rate for such Stub Period is determined using linear interpolation based on the two index rates that surround the Stub Period this can be applied either at the start or end of that period: Front or Back.
- Trade Types
 - The Platform may support the following trade types:
 - Outrights
 - An Outright swap is where one party is the payer of the fixed rate and receiver of the floating rate and the other party is the receiver of the fixed rate and payer of the floating rate.
 - Spreads also known as Swaps
 - These are the simultaneous purchase and sale of two different Tenors of the yield curve (e.g. 2 year by 10 year).
 - Butterflies
 - Butterflies are the simultaneous purchase(s) and sale(s) of three different tenors of the yield curve (e.g. 2 year by 5 year by 10 year).
- Instrument minimum and incremental Size.
 - Minimum notional size is dependent on currency and tenor
 - Block Trades
 - Minimum notional size as stated by the CFTC and increments dependent on currency and tenor.
- Quoting Convention
 - Outrights are quoted in interest rate yield in minimum of 1/40th of a basis point increments.
 - Spreads and Butterflies will be quoted in basis points dependent in multiples of the increments of the underlying Outrights
- Last Trading Day.
 - Spot Starting
 - Close of business on Trade Date.
 - Forward Starting
 - Close of business three business days prior to the Effective Date of the swap.
- Block Trades must occur outside the CLOB and in a quantity that meets or exceeds CFTC thresholds.

CLP Fixed vs Camara Floating Rate OIS

“Camara” is an overnight index calculated on a daily basis by an official entity (ABIF) based on the overnight lending rate published by the Chilean Central Bank.

The swap is quoted with both fixed and floating side payment frequency of bullet (at maturity) for trades of 1 month to 18 months or semi-annual from 2 years and longer (up to 30 years).

- Value Date t+2

- Rate Day Count: ACT/360
- Rate Frequency Zero Coupon from 1 month to 18 months and s/a from 2 years and longer.
- Day Convention Modified Following
- Calendars New York & Santiago

CLF Fixed vs Camara Floating Rate XCCY OIS

CLF is an Inflation currency derived from the Inflation Index called UF. This swap can be called UF vs Camara or CLF vs Camara. Both (UF & CLF) names are synonymous.

This swap can be considered as Cross Currency Swap because the floating rate is CLP TNA against the Inflation Index currency on the fixed side.

This swap trades from 1 month up to 18 months zero coupon (at maturity) with maturity on the day 9th of the correspondent month, So can be long stub at the beginning of the month and short stub at the end of the month. Example. Today is 2013 October 1st, the Value Date is Oct 3rd (t+2), 1 year tenor will be for Oct 9th 2014 (371 days for 1 year trade), Now if today is October 22nd, Value Date Oct 24th then the 1 year trade will be for Oct 9th 2014 (350 days for 1 year trade).

From 2 years and longer, semi-annual frequency on regular swap dates conventions.

- Value Date t+2
- Rate Day Count ACT/360
- Rate Frequency Zero Coupon from 1 month to 18 months and s/a from 2 years+
- Day Convention Modified Following
- Calendars New York & Santiago

Non Deliverable Swaps

An NDIRS/NDS trade has many trade terms. For example, notional amount, fixed interest rate, floating rate, reference rate, holiday convention, etc. This should be clearly specified to avoid ambiguity. The deal is agreed on the basis that net settlement will be made in USD, or another fully convertible currency, to reflect any differential between the agreed fixed rate and the actual floating rate on the settlement dates. Both NDS and ND IRS are quoted as Offer/Bid. For ND IRS it's the fixed leg which is quoted, hence it comes under Fixed Income Derivatives.

- ND IRS
 - An agreement between two parties (known as counterparties) where one stream of future interest payments is exchanged for another based on a specified principal amount. Interest rate swaps often exchange a fixed payment for a floating payment that is linked to an interest rate (most often

the LIBOR). The interest rate cash flows are net settled in a major currency on fixing date. A company will typically use interest rate swaps to limit or manage exposure to fluctuations in interest rates, or to obtain a marginally lower interest rate than it would have been able to get without the swap.

- Interest rate swaps are simply the exchange of one set of cash flows (based on interest rate specifications) for another. Because they trade OTC, they are really just contracts set up between two or more parties, and thus can be customized in any number of ways.
- ND OIS :
 - In Singapore, India IRS is traded as ND OIS.
- NDS
 - NDS typically refers to a non-deliverable cross currency swap where the two legs are a major currency and a non convertible currency. Periodic interest amount of the two legs are exchanged and converted into a major currency for net settlement after fixing. NDS can also refer to a non deliverable interest rate swap, with similar features to IRS, except that the interest rate cash flows are net settled in a major currency on fixing date.
- Cross Currency Swap (CCS)
 - On THB from time to time we see CCS being traded onshore. A CCS, also referred to as cross currency interest rate swap is an agreement between two parties to exchange principal and interest payments denominated in two different currencies. The exchange of interest rate can be in the form of fixed to fixed rate, or floating to fixed rate, or floating to floating rate.

Specifications

- Trading Conventions
 - Buyer (Payer) pays fixed interest rate and receives floating interest rate.
 - Seller (Receiver) receives fixed interest rate and pays floating interest rate.
- Swap Leg Conventions
 - The terms of Fixed versus Floating interest Rate Swaps are based on a number of combinations of the criteria below.
 - Fixed Leg
 - Payment Frequency
 - Monthly, Quarterly, Semi-Annually, or Annually
 - Day Count Convention
 - Actual/360, actual/365, 360/360, 30/360, 30E/360, Actual Fixed/365, actual /366, actual / actual
 - Holiday Calendar
 - Applied in accordance for the country currency denoted for the instrument
 - Business Day Convention
 - Modified following with adjustment to period end dates. Business days in this convention must be valid business days for the countries denoted by the currency. If not, it will be the next day that is a business day on both calendars.
 - Fixed Rate

- The traded interest rate yield or basis points on Trade Date
- Floating Leg
 - Reset Frequency
 - Monthly, Quarterly, Semi-Annual
 - Day Count Convention
 - Actual/360, actual/365, 360/360, 30/360, 30E/360, Actual Fixed/365, actual /366, actual / actual
 - Holiday Calendar
 - Applied in accordance for the country currency denoted for the instrument
 - Business Day Convention
 - Modified Following with adjustment to period end dates. Business days in this convention must be valid business days for the countries denoted by the currency. If not, it will be the next day that is a business day on both calendars.
 - Fixed Rate
 - The traded interest rate yield or basis points on Trade Date
 - Interest Rate Benchmark
 - EBOR, BBSW, LIBOR, EURIBOR, CIDOR, PRIBOR, CIBOR2, BUBOR, TELBOR, NIBOR, BKBM, WIBOR, STIBOR, JIBAR, SAIBOR, TIBOR, CZEONIA, TRLIBOR, MOSPRIME
- Effective Date
 - The first date from which fixed and floating interest amounts accrue. It is also referred to as the Start Date or the Value Date. The Effective Date of the Swap must be a business day subject to the appropriate Business Day Convention.
- Trade Start Type
 - Spot Starting.
 - A swap whose Effective Date is 2 business days from the Trade Date (T+2).
 - Forward Starting
 - A swap whose Effective Date is anything after the Effective Date for a Spot Starting swap.
 - Same Day Starting
 - A swap whose Effective Date is the same as the Trade Date (T+0)
- Maturity Date
 - The final date until which Fixed and Floating amounts accrue
- Tenor
 - The duration of time from the Effective Date to the Maturity Date. Tenors of any duration greater than 0 years to 50 years.
- Roll Day Convention
 - The date used for determining all fixed and floating Reset Dates. Roll Days define the beginning and end of Fixed and Floating interest accrual periods.
 - For On-the-Run Contracts, the Roll Day is the same date of the month as the Effective Date.
 - For Off-the-Run Contracts, it can be any date of the month, subject to the provisions of the Business Day Convention
 - Roll Day marks the start of a new interest accrual period, and is the date on which a Reset Rate takes effect.
- Trade Types

- The Platform may support the following trade types:
 - Outrights
 - An Outright swap is where one party is the payer of the fixed rate and receiver of the floating rate and the other party is the receiver of the fixed rate and payer of the floating rate.
 - Switches or Spreads
 - Is the simultaneous purchase and sale of two different Tenors of the yield curve (e.g. 2 year by 10 year).
 - Butterflies
 - Butterflies are a combination of two spreads/switches (e.g. 2 year by 5 year by 10 year).
- Contract Size
 - Minimum notional size is dependent on the associated Risk. It is represented in terms of DV01. For Emerging Markets ND IRS and NDOIS the minimum is 5K DVO1. For NDS the minimum size is considered USD 5 Mio.
- Risks associated with interest rate swaps
 - A party entering a swap takes on exposure to a given interest rate; the exposure can be long or short depending on whether a counterparty is paying or receiving the fixed rate. At the same time, each party take on the risk - known as counterparty credit risk - of the other party defaulting at some time during the life of the contract.

Interest Rate Options on the Mexican Peso

- TIIE Swap Options
 - The Mexican Swap option market allows counterparties to buy or sell European style options of various maturities on the MXN fixed/float TIIE interest rate swap market.
 - These options enable option buyers the right but not the obligation to pay or receive a fixed interest rate at a given strike price on a given date in an agreed upon amount for a given swap maturity. Delta neutral strategies are for the most part quoted as Black and Scholes volatility expressed as a percentage of yield / underlying swap rate. Live premium prices for given structures are also quoted.
 - Option Style: European style
 - Expiration: 12:30pm New York time
 - Premium Payment: Paid in MXN by buyer to option writer value one
 - Mexican business day following trade date (T+2).
 - Option Maturities:
 - Option maturities are by default, calculated using the Mexican TIIE 28-day calendar but can be date specific or conform to regular calendar maturities. Maturities are calculated from the trade date (T0) to the expiration date.
 - Mexican TIIE calendar example:
 - In the case of a six month option using the 28-day TIIE calendar, option expiration will occur 168-days (6 coupons of 28-day TIIE) (T+168) from the trade date (T0).
 - T0 = September-23-2005
 - Expiration = March-10-2006 12:30pm New York time.

- In the case of expiration falling on a holiday, the expiration date will be adjusted according to Mexican business day following convention.
- USD Swap Option example:
 - In the case of plain vanilla calendar year calculations, a six-month option expiration will be calculated as the date exactly six calendar months after the trade date (T0).
 - T0 = September-23-2005
 - Expiration = March-23-2006 12:30pm New York time.
 - In the case of a MXN option, using this calendar with expiration falling on a holiday, the expiration date will be adjusted according to Mexican business day modified following convention.
 - Option Settlement:
 - Currently, in the event of option exercise the physically delivered Interest Rate swap has an effective date one Mexican business day following option expiry.
 - Cash Settlement:
 - ICAP is currently taking the initiative in creating a daily Interest Rate Swap fixing mechanism to allow counterparties to cash settle swaptions: dramatically reducing the trade's credit profile. ICAP is currently the calculation agent for USD swap fixings.
- TIIE Caps & Floors
 - MXN TIIE caps and floors share the exact same payment calendar as TIIE interest rate swaps except for the initial TIIE reference. Caps and floors initially reference TIIE on trade date + 28 days, providing for one less calculation period than the corresponding interest rate swap maturity. Intrinsic value, if any, for each caplet or floorlet, is paid by option writer to option buyer in arrears for each subsequent calculation period on an Actual/360 day count basis using a following Mexican business day payment convention.
 - Premium Payment:
 - Paid in MXN by buyer to option writer value one Mexican business day following trade date (T+2).
- UDI/LIBOR Cross Currency Swap
 - The UDI vs LIBOR cross currency swap is structured as MXN peso fixed vs USD LIBOR floating swap where the MXN rate is paid as a Real rate of interest calculated to a Mexican Peso notional that is adjusted periodically to inflation using the UDI Index. The UDI Index is published on Reuters Page MEX14, Bloomberg and can also be found on the Banxico website, and is adjusted on a daily basis according to published inflation rates. Although UDI/LIBOR swaps are quoted in USD the value of the UDI Index in tandem with the fair value of Spot USD/MXN at the trade's inception, allows us to determine the structure's UDI notional amount which in turn enables the counterparties to adjust the MXN notional to inflation for each relevant calculation period. The UDI notional is calculated as follows
 - $\text{USD Notional} \times \text{Spot USD/MXN} / \text{UDI Index}$ as published for value spot.
 - The structure of this swap requires an initial and final exchange of currencies.

- Initial Exchange:
 - The UDI rate payer sells USD notional to the USD rate payer
 - The USD rate payer sells USD x Spot F/X in MXN to the UDI rate payer
- Final Exchange:
 - The UDI Rate Payer sells UDI Notional to USD Rate Payer
 - The USD Rate payer sells USD notional to the UDI rate payer.
- The vanilla structure is: Effective date value spot. Semi-annual coupons of UDI vs 6-month USD LIBOR paid in arrears on an Act/360 modified following day count basis. The most traded maturity is currently the 10-year.
- On occasion UDI swaps are traded with 28-day TIIE as the floating rate. Price is adjusted using the LIBOR/TIIE cross currency basis swap value for the equivalent maturity vs the UDI/LIBOR fair value.

TIPS Asset Swaps

Several variations of the inflation asset swap structure exist. In its simplest form it can be treated as consisting of two separate trades. In return for an upfront payment of par (par inflation asset swap) or the dirty price (market asset swap), the asset swap buyer:

- Receives an inflation-linked bond from the asset swap seller. Typically the bond is trading away from par. Depending on the passed life of the trade the bond can trade substantially away from par.
- Enters into a series of inflation swaps (equivalent to the OTC inflation bond described in Section 7.1) to pay the asset swap seller inflation coupons equal to that of the asset. In return the asset swap buyer receives regular floating rate payments of Libor plus (or minus) an agreed fixed spread. The transaction is shown in Figure 7.6. The fixed spread to Libor paid by the asset swap seller is known as the asset swap spread and it is set at a breakeven value such that the net present value of the transaction is zero at inception.
- Notional
 - Typically 25mm and above
- Tenors
 - Published from the TIPS
- Fixed Payment Dates
 - Semi-Annually commencing 07/15/2013. In the event that a payment date discrepancy exists between the swap and the Reference Security, the payment date on Reference Security will govern.
- Float Payment Dates
 - Quarterly on an Act/360 basis, commencing 04/15/2013 (Modified following)
- Final Principal Amount (FPA)
 - The final principal value of the Reference Security at Maturity
