- 17.4 The User ID assigned to an Authorised Trader may not be used by or reassigned to any other person. No person may access the TP ICAP EU MTF or submit orders using a User ID that has not been assigned specifically to that person.
- 17.5 The Operator may refuse to recognise the designation of a person as an Authorised Trader by not granting, revoking or suspending that person's User ID in order to protect other Participants and the integrity of the TP ICAP EU MTF, and the Operator shall promptly notify the relevant Participant of any such action.
- 17.6 Participants must terminate an Authorised Trader's access to the TP ICAP EU MTF upon termination of the Authorised Trader's appointment, employment or authorisation. A person will cease to be an Authorised Trader upon revocation of their User ID. The Operator will promptly revoke the User ID of an Authorised Trader following receipt of a request from the relevant Participant.
- 17.7 Each Participant shall be responsible for all Orders submitted or Transactions entered into using any of the User IDs assigned to its Authorised Traders.

18. Cessation of Use or Access

- 18.1 Where a Participant has given notice of its intent to cease exercising its Trading Privileges or accessing the TP ICAP EU MTF, the Venue Rules will continue to bind the Participant until:
- 18.1.1 all of the Participant's outstanding Orders have resulted in Matched and/or Executed Transactions, or have been cancelled or withdrawn;
 - 18.1.2 all outstanding obligations of the Participant with respect to Transactions have been performed;
 - 18.1.3 all other outstanding obligations of the Participant under the Venue Rules (including without limitation the settlement of any outstanding Venue Fees or other sums due) have been performed; and
 - 18.1.4 the Participant has ceased using or accessing the TP ICAP EU MTF, returned any physical property of the Operator or any Affiliate of it, and destroyed or securely deleted any software or confidential information applicable to the Operator or copies thereof. On request from the Operator, the Participant shall provide the Operator with a written statement signed by its Authorised Representative confirming such actions have been taken.

19. Connection to the Trade Capture System

- 19.1 When supported for Products as detailed in the Product Specifications, Participants may connect directly to the Trade Capture System via a graphical user interface ("**GUI**") or an application program interface ("**API**"), which allows third-party trading systems to interact with the Trade Capture System.

20. Submission of Orders

- 20.1 Orders may be submitted to the TP ICAP EU MTF as provided for in the Product Specifications.
- 20.2 Orders submitted by Participants to the TP ICAP EU MTF must include the User ID assigned to the Authorised Trader. Participants submitting Orders to the MTF should timestamp them as at their time and date of issue. Participants receiving Orders from their clients should timestamp them as at their time and date of receipt.

21. Cancellation or Rejection of Orders

- 21.1 Participants may cancel, withdraw or amend an Order submitted by them; provided, however, that an Order may no longer be cancelled, withdrawn or amended once it has been Executed.
- 21.2 The Operator may reject any Orders that, in the Operator's opinion, are erroneous or that exceed volume or price thresholds set by the Operator. The Operator may apply the relevant Venue Fee for a rejected Order.
- 21.3 When an Authorised Trader disconnects from a trading system operated by the TP ICAP EU MTF, which is being accessed through an API, all of its outstanding trade requests on each of the applicable trading systems will be cancelled and withdrawn.

22. Matching and Execution

- 22.1 An Order submitted in accordance with the Venue Rules can potentially interact with other, opposite, Orders in the TP ICAP EU MTF until such time as the Order:
 - 22.1.1 has Traded on the TP ICAP EU MTF in accordance with the Venue Rules; or
 - 22.1.2 has been rejected, cancelled or withdrawn in accordance with Rules 15 or 20.
- 22.2 For ease of reference, and without prejudice to the foregoing or the content of the Product Specifications from time to time, a summary of the trading protocols used with Orders in the TP ICAP EU MTF is set out below:

TPIO - Repo (excluding Liquidnet)

1. Central Limit Order Book (CLOB) Execution also known as E-repo Type of system according to RTS 2 annex 1 : Continuous auction order book trading system

Orders submitted in the E-repo CLOB (Via GUI or API) interact and are matched through a click-to-trade mechanism to generate an order match or automatic matching when price levels meet.

For each financial instrument, the aggregate number of orders and the volume they represent at each price level, for at least the five best bid and offer price levels are visible by all participants.

Matching is on a price time priority basis. Up until the point in time when an order match occurs, the Participant who submitted the order may cancel or amend the order. It will be visible to all active CLOB participants that the order has been cancelled or amended.

Orders will remain active until the specified expiry time or the end of the trading session is reached. The CLOB can admit limit and iceberg orders.

When an order match occurs the transaction can be partially or fully executed. Participants have the choice to leave any remaining unexecuted quantity in the order book (Fill & Save) or cancel it (Fill & Kill).

The relevant participants are sent an automatic confirmation of the match.

The transaction executed can be bilaterally settled or cleared through LCH upon client instruction.

For bilaterally settled transactions the relevant participant can agree alternative settlement terms.

LNFI - Liquidnet Debt Segment - Debt Products

1. Periodic Auction Trading System also known as Matchbook Rebalance Type of system according to RTS 2 annex 1 : Periodic auction trading system

Orders are submitted in the Periodic Auction Trading system (via GUI or API).

The Periodic Auction has two phases – an upload phase, where participants submit their orders and can amend or cancel orders at any time. Participants must submit a security, direction and size as a minimum and have optionality to also submit a price.

The price will be used as a reference price only, and all trades will be executed at an independent third-party mid-price source.

Participants can utilise functionality to ensure their portfolio is kept within defined parameters using risk constraints. Risk constraints limit the amount of each bond traders want to buy or sell. Limits can be applied to individual orders or groups of orders (buckets).

At the end of the upload phase, the matching phase begins, where submitted orders are matched using our proprietary matching algorithm, which seeks to maximise traded volume at an independent third-party mid-price source.

There is no time or price prioritisation of orders during the matching and any unfilled orders are cancelled at the end of the session. Participants only see their own orders and trades. Post-matching, participants will receive electronic confirmation of their trades and be able to view them on the GUI. Trades are settled on a matched principal basis.

If a Participant sends an order on a LIQUID Bond which is below the LIS, the pre-trade transparency will be ensured through : <https://mifidiidata.iwip.tpicap.com/transparency-data>.

2. Request For Quote (RFQ) Execution

Type of system according to RTS 2 annex 1 : Request for quote trading system

The RFQ operates on an all-to-all trading protocol meaning any Participant can act as an RFQ requestor or an RFQ responder.

Participants are able to request or respond to RFQs via GUI or API. An RFQ Requester can request one-way or two-way prices in any size from RFQ Responders.

The requesting Participant must specify the time period during which the RFQ will be live and can select which RFQ responders to send to.

During the time the RFQ is live, the receiving Participants may provide updated quotes in response.

The RFQ Requester will be notified of the best prevailing one- or two-way price from responders which it may decide or not to execute.

Requestors can execute versus the best price available only. RFQ responder quotes are either firm orders or actionable indications of interest ("AIOI"). AIOI's are re-confirmed with the RFQ responder upon an execution of a quote generated by an AIOI.

RFQ responders can choose to disclose their identity or remain anonymous for all RFQ activity.

In case a liquidity provider opts in for anonymity, they do not get to see the identity of RFQ submitters, nor do they know how many other liquidity

providers they are in competition with. Whereas disclosed RFQ responders get to see both.

Participants can only see their own orders and trades. Where an order does not qualify for one of the applied waivers, typically in the case of an order below LIS in respect of a liquid bond, pre-trade transparency will be ensured through <https://fiquotes.liquidnet.com>.

All transactions are either settled through a settlement agent or bilaterally settled.

3. Central Limit Order Book (CLOB) Type of system according to RTS 2 annex 1 : Continuous auction order book trading system

Orders submitted in the CLOB (Via GUI or API) interact and are matched through a click-to trade mechanism to generate an order match or automatic matching when price levels meet.

When Orders are submitted into the CLOB, they will be displayed on a screen visible to all active participants. The information that will be visible in respect of each Order will be the instrument identifier, and the price and volume at which the submitting participant is willing to execute. Pre-trade, orders in both liquid & illiquid bonds are displayed (non-attributed) on our GUI & FIX market data API to participants in real-time.

Matching is on a price-time priority basis. Up until the point in time when an Order match occurs, the Participant who submitted the Order may cancel or amend the Order. It will be visible to all active CLOB Participants that the Order has been cancelled or amended.

Orders will remain active until the specified expiry time or the end of the trading session is reached. When an order match occurs the transaction can be partially or fully executed.

Participants have the choice to leave any remaining unexecuted quantity in the order book or cancel it.

When an Order has been executed, the Participants are sent confirmations of the match.

All transactions are settled through a settlement agent.

4. Trade Registration

Type of system according to RTS 2 annex 1 : Hybrid System

Orders can be submitted into the trade registration system via GUI, API or e-mail by clients. Orders can be matched via electronic and non-electronic means. Where an order does not qualify for one of the applied waivers, typically in the case of an order below LIS in respect of a liquid bond, pre-trade transparency will be ensured through <https://fiquotes.liquidnet.com>.

Matched orders are submitted to the MTF as Registered Trades by the participant. Transactions are negotiated privately and can be submitted by the Participant of the MTF where the Participant is acting on behalf of both the buyer and seller.

Matching is based on the following parameters:

- Side of the order/indication
- Size (we allow minimum size constraints to ensure orders are large enough to trigger a match)
- Type of client

In case of partial execution, the remaining quantity stays available to trade for the day or until cancelled.

When an Order has Executed, the clients are sent confirmations of the trade.

All transactions are settled through a settlement agent.

TPEE - “Cash Equity & ETF Segment” (excluding Liquidnet)

Orders can be submitted to the “Fusion Equity” platform electronically to the Request for Quote Trading System (RFQ).

1. RFQ Execution

Type of system according to RTS 1 annex 1 : Request for quote trading system

Orders can be submitted to the “Fusion Equity” platform electronically to the Request for Quote Trading System (RFQ).

The requesting Participant must specify the time period during which the RFQ will be open.

During this time, the receiving Participants may provide quotes in response, which shall be deemed to be live until the expiry of the RFQ period.

The requesting Participant may view the best bid and offer available to trade in the size requested.

The requesting Participant may elect to enter into a Transaction on the basis of a quote received through the RFQ.

Requesting Participants may leave resting Orders in the Request for Quote Trading System. The resting Order is a limit Order for the full size requested and will be valid until cancelled or the Request for Quote Trading System session ends.

Trades are settled on a matched principal basis.

2. Trade Registration

Type of system according to RTS 1 annex 1 : Hybrid System

Designated telephone lines, email addresses and other electronic communication systems may be used to submit Trade Requests.

Brokers will attempt to match corresponding Trade Requests through interaction with those received or provided by other Brokers or Venue members by publicising them using Voice. If there is a match, then, unless the Broker has been instructed by the Venue member to seek confirmation from the relevant Venue member of their intention to enter into a Transaction prior to its Execution, the Broker may indicate that a Transaction has been entered into, which shall be binding on each relevant Venue member.

Trades are settled on a matched principal basis.

LNEQ - Liquidnet Equity Segment - Equity Products

1. Trade registration

Type of system according to RTS 1 annex 1 : Hybrid System

Clients can either send indication of interest (IOI) or firm orders. An IOI is offered the opportunity to trade when a Firm Order in the system is available. It is offered this opportunity based on the size and price of the firm order and IOI being compatible. At that point the IOI sender is provided with the opportunity to send in a firm order to be able to trade. Once they choose to send in a firm order, it will execute against the firm order already in the system.

Orders admitted on the off book protocol are limit or market orders which are good for the day. Orders can be amended or cancelled as needed by clients. In case of partial execution, the remaining quantity stays available to trade for the day or until cancelled.

Orders can be matched by clients via electronic and non-electronic means, subject to such matching being undertaken in accordance with the relevant waivers from pre-trade transparency as described in the TPIE Rulebook and Product Specifications. Matched orders are submitted as Registered Trades by the participant.

All transactions are settled through a settlement agent.

23. Pre-Execution Credit Checks

- 23.1 Prior to the Execution of any Cleared Derivative Transaction for which the relevant Participant is not a Clearing Member, the Operator will facilitate pre-execution credit screening by or on behalf of the Participant's designated Clearing Member. Upon receiving timely confirmation that the Cleared Derivative Transaction will not exceed the Clearing Member's pre-execution limits with respect to such Participant, the Operator will accept the Cleared Derivative Transaction for Execution. If the Operator does not promptly receive timely confirmation, or receives notice that the Cleared Derivative Transaction does not satisfy the Clearing Firm's pre-execution limits with respect to such Participant, the Operator will cancel that Cleared Derivative Transaction and may apply the applicable Venue Fee.
- 23.2 Any Participant that is a Clearing Member with respect to a Cleared Derivative Transaction is deemed to represent, by submitting an Order for its proprietary account, that it has completed pre-execution screening of its internal clearing risk limits for proprietary accounts.

24. Confirmations

- 24.1 The Operator may send a Confirmation to each Participant that is a counterparty to a Transaction Executed or registered on the TP ICAP EU MTF, at the time that the Transaction is Executed or registered or as soon as reasonably practicable thereafter. The Operator may seek to obtain and apply a Transparency Waiver from publication of all or part of such Pre-Trade Data.
