INTRODUCTION

1.1. General

The fees detailed in the rate card corresponds to:

- Execution fees for the transactions executed in the venue
- Trade registration fees for the transactions registered with the venue

The fees for name give up transactions payable by a Venue User will be calculated monthly in arrears and are payable upon presentation of an invoice. Matched principle business will be settled with a delivery versus payment basis. For further details on payment of fees please refer to the ICAP Terms of business on our website: www.icap.com

Venue Users are responsible for the payment of any applicable taxes and charges of any public agency or authority, including without limitation any financial transactions tax or value added tax.

1.2. Execution Fees

Transactions arranged within the venue will be subject to an execution fee, as specified for the relevant product in the accompanying Appendix for each market segment of the Venue. Depending of the product, the execution fee can be either a commission invoiced at the end of the month or a spread included in the price of the transaction.

The Operator reserves the right to increase or decrease the standard rate or split an improved fill with the customers agreement depending on the liquidity of the instrument and market conditions at time of trade. Any variance from the standard rate card will be disclosed to the customer at time of trade and will be in accordance with the Operator's Order Handling and Best Execution Policy

1.3. Discounts/Incentives

If the execution fees incurred by a Venue User exceed the discount thresholds specified for the relevant Product, then the discounts shown shall be applied to the execution fees payable by the Venue User in the relevant month.

1.4. Co-Location

Operator has outsourced the hosting of its servers to Equinix UK. It is possible to obtain information about co-location of servers, with standardised rates, from Equinix UK. Please contact a relationship manager for more information.

INTEREST RATE DERIVATIVES - IOIR

1.5. Tradable Instruments

Trading is permitted in the IRD Segment in the following Tradable Instruments:

**Please contact the Operator for the full list.	

The discount structures in the IOIR segment apply to all trades executed by the same trader (or same trading team), and for all LEIs the trader is acting on behalf of, as long as they are part of the overall client group the trader is representing.

All trades executed by the same individual trader (or same group of individual traders) will accrue towards a combined volume, for which if the relevant discount tier threshold is met, a discount will be applied.

Participants are required to provide evidence of their trading structure model to the venue, in order for a combined volume discount structure to be applied.

1.6. Inflation - Voice

Inflation swaps & options products (%)	
EUR inflation swap	0.0015

Brokerage is calculated based on DV01 of notional

Spread methodology: Size of long leg multiplied by the difference in Dv01s of the 2 legs.

Butterflies: to be calculated as a sum of the brokerage of the 2 spreads.

Calendar spreads with less than 12 month gap to be charged as 1y brokerage

Inflation Cross Index Trades: Brokerage is charged as a peripheral index outright.

E.g. a 10y EU vs FR would be charged as a 10y FR, a 5y EU vs Spain would be charged as a 5y Spain.

lotas: brokerage charged the same as outright swaps

lotas boxes: brokerage charged using swaps spread methodology at lota rate

EFP incentive schemes

Link - Index EFP FIX connectivity incentive scheme

Participant eligibility and obligation: The scheme is open to all Participants that access the Fusion platform via FIX connectivity for trading purposes, i.e. not just post trade services.

A discount to the current standard brokerage rate will be offered for the following month depending on notional volume traded in the current month, i.e. the current month's volume sets the potential discounted brokerage rate which will be applicable for the following calendar month.

Notional traded	Brokerage rate (bps)
GBP0 – GBP2,000,000,000	0.25 bps
GBP2,000,000,001 – GBP3,000,000,000	0.225 bps
GBP3,000,000,001 – GBP4,000,000,000	0.2 bps
GBP4,000,000,001 – GBP 5,000,000,000	0.175bps
> GBP5,000,000,001	0.15 bps

Example: Assuming a Participant trades GBP4.5bn in the current month, its brokerage rate for the next calendar month will be 0.175bps. The notional of the trade will be converted to a sterling equivalent using the ICAP monthly FX conversion rate.

Link - e-EFP incentive scheme

“e-EFP” means an EFP transaction that was concluded on the Fusion OTF platform by the Trader directly without any broker involvement.

A discount to the current standard brokerage rate will be offered for the following month depending on notional volume traded in the current month, i.e. the current month's volume sets the potential discounted brokerage rate which will be applicable for the following calendar month.

Notional traded in e-EFP	Brokerage rate (bps)
GBP0 – GBP 500,000,000	0.25 bps
>GBP 500,000,000	0.175 bps
