INTRODUCTION

1.1 General

The fees payable by a venue user will be calculated monthly in arrears and are payable upon presentation of an invoice. For further details on payment of fees please refer to the iSwap Euro B.V. Terms of business on our website: <https://tpicap.com/regulatory-hub/iswap-euro-mtf-sef>

Venue users are responsible for the payment of any applicable taxes and charges of any public agency or authority, including without limitation any financial transactions tax or value added tax.

1.2 Transaction and Execution Fees

Transactions arranged within the venue will be subject to a transaction or an execution fee, as specified for the relevant product in 1.7/1.8 Transaction Fees or 1.9 Execution Fees for each market segment of the venue.

1.3 Discounts/Incentives

If the transaction fees (Section 1.7) incurred by a venue user exceed the discount thresholds specified for the relevant product in 2.0 Volume Discount Structure, then the discounts shown shall be applied to the transaction fees payable by the venue user in the relevant month.

1.4 Co-Location

Operator has outsourced the hosting of its servers to Equinix UK. The iSwap Venue does not offer co-location services to platform Participants.

ISWAP SEF/MTF

1.5 Tradable Instruments

Trading is permitted in the IRD Segment in the following Tradable Instruments:

Financial Instruments	Parameters
Interest Rate Swap	Fixed/Floating,
Single Currency Basis Swap	EUR: Traded as Two Fixed/Floating Swaps
Overnight Index Swap	Overnight Index Swaps

Trading is permitted in the IRD Segment in the following types of Transactions (including Package Transactions):

Transaction Types	Parameters (where applicable)
Outright	A Transaction in a single interest rate instrument from the list of Tradable Instruments above (" Interest Rate Products ")

>€10,000,000,000 10 year equivalent notional traded	50% Discount on Orderbook Trades This will be the discount floor	0.0001% p.a.

2.1 Market Maker Programme Incentives and Criteria

Programme Instrument	Bid/Offer spread (b.p)	Size (longer leg of spread)	Discount to Headline Rate	Volatile Market Bid/Offer spread (b.p)
Market Maker Programme 1 (MMP1)			37.5% (0.000125% pa)	
A-EUR 2Y*	0.7bp	100m		1.3bp
A-EUR 5Y	0.5bp	50m		1.0bp
A-EUR 10Y	0.5bp	25m		1.0bp
After € 5,000,000,000 10Y CLOB equivalent notional traded in a month			50% (0.0001% pa) on trades transacted after the volume threshold	
Market Maker Programme 2 (MMP2)			50% (0.0001%)	
A-EUR 2Y*	0.7bp	100m		1.3bp
A-EUR 5Y	0.5bp	50m		1.0bp
A-EUR 10Y	0.5bp	25m		1.0bp
A-EUR 5Y Spot Bobl.softc* ("5Y Gadget")	0.5bp	50m		1.0bp
A-EUR 10Y Spot Bund.softc* ("10Y Gadget")	0.5bp	25m		1.0bp
A-EUR 5Y-10Y.sp	0.6bp	25m		1.0bp
A-EUR 10Y-30Y.sp	1.0bp	10m		1.5bp
A-EUR 7Y* (alternative to 5Y Gadget)	0.5bp	35m		1.0bp
A-EUR 30Y* (alternative to 10Y Gadget)	1.0bp	10m		1.5bp
**The number one overall ranked Qualifying Market Maker receives a 100% discount on their API Data license fee for that month. The second ranked qualifying Market Maker will receive a 50% discount. All other qualifying Market Makers will receive a 33.3% discount to their API Data licence fee for that month.				
** For the months of May26-Dec26 (inclusive), any Market Maker who streams at the Non-Volatile bid/offer spreads during a declared Volatile Market period and conforms to the MMP2 terms for 50% of the month, will receive a 100% discount on their API Data license and additionally a 100% discount on any CLOB Brokerage incurred within the Calendar month.				

*Under MMP2 a market maker may replace both 5Y and 10Y Gadget with both A-EUR 7Y and A-EUR 30Y as alternatives. In addition, when the operator has declared a volatile market, under MMP1 a market maker may replace A-EUR 2Y with A-EUR 7Y as an alternative. Under MMP2, a market maker may replace A-EUR 2Y with A-EUR 7Y as an alternative, provided this substitution still allows for the streaming of 7 qualifying instruments. For the purposes of the API discount, Market Makers who quote all 9 MMP2 instruments, their highest 7 ranked instruments will be taken into account.

Market Makers shall provide the Order Book with an Executable Price Stream for at least 70% of the Monitored Trading Day, averaged over each calendar month, or 50% in a month where the Operator has declared a volatile market.

** Market Makers qualifying for MMP2 will also be ranked according to three equally weighted criteria:

- Percentage of Monitored Trading day at Top of Book;
- Percentage of Monitored Trading Day when quote compliance is achieved;
- Average bid/offer spread when quote compliance is achieved.

A rank will be calculated for each MMP2 instrument, and then one overall rank across the top 7 instruments quoted. A rank tie will be resolved by Percentage of Monitored Trading Day at Top of Book.

A Market Maker will be deemed to have met the qualifying Bid/Offer spread for any Programme Instrument if either its Bid or Offer is at the best price level, so long as the aggregate iSwap orderbook Bid/Offer spread in the Programme instrument at that time is no greater than the qualifying Bid/Offer Spread.

In addition to the standard and volatile market spreads, the Venue may, from time to time, determine that certain events, outside of regular economic releases or central banks meeting, contribute to extreme volatile market conditions.

The Venue will use qualitative factors to determine that these extreme volatile market conditions have occurred, and the Venue may grant a 50% discount on the API Data license fee for the top two ranked Market Makers.

If any single Market Maker has achieved compliance with either the standard or volatile market MMP2 spreads during the relevant month, then the Venue will not apply any additional discretion.

A Participant will not qualify as compliant with the Programme Eligibility Criteria if utilising an algorithmic “follow” routine which largely applies a simple arithmetical spread to the existing aggregate bid offer values available on the Programme Instruments, in order to achieve programme compliance.

Monitored Trading Day is 9am – 6pm Central European time.
